# Beginning

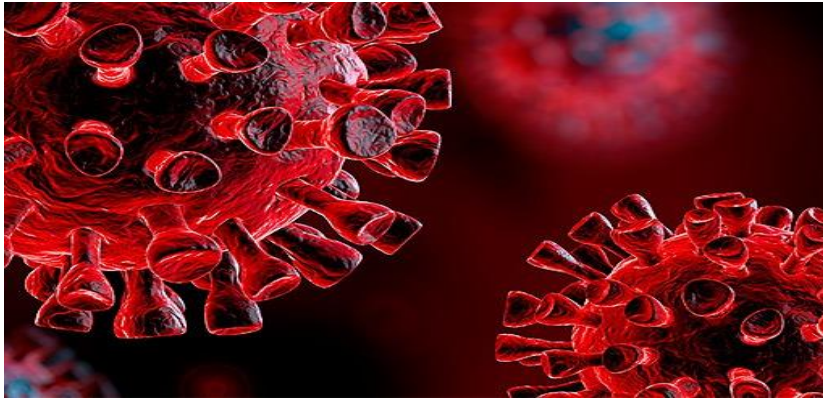

The coronavirus outbreak began on November 17, 2019 in Wuhan, China. WHO officially declared it as a pandemic on March 19, 2020.

Officially the coronavirus arrived in Poland on March 4, 2020. On that day the Minister of Health announced the first confirmed case of SARS-CoV-2 infection.

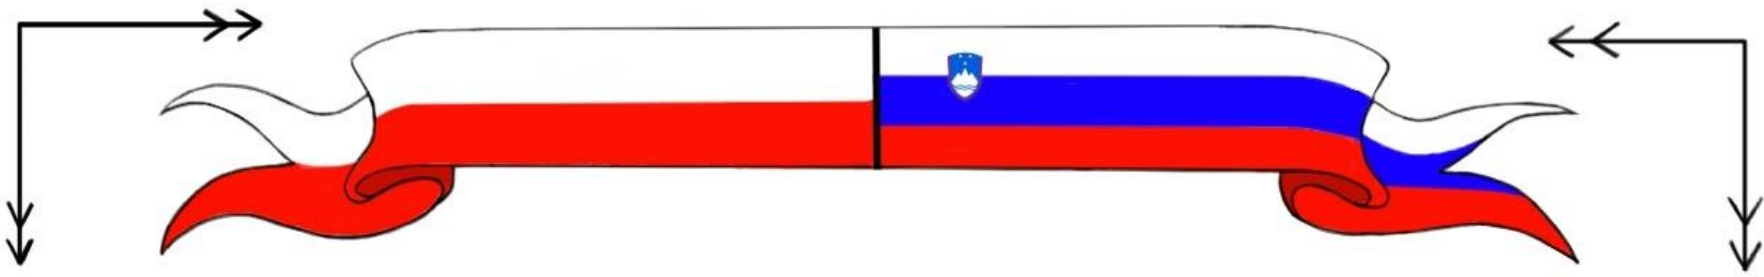

In Slovenia COVID-19 was officially announced on March 4. as well, when the first infected human was found.

# **VIRUS FROM THE LAB**

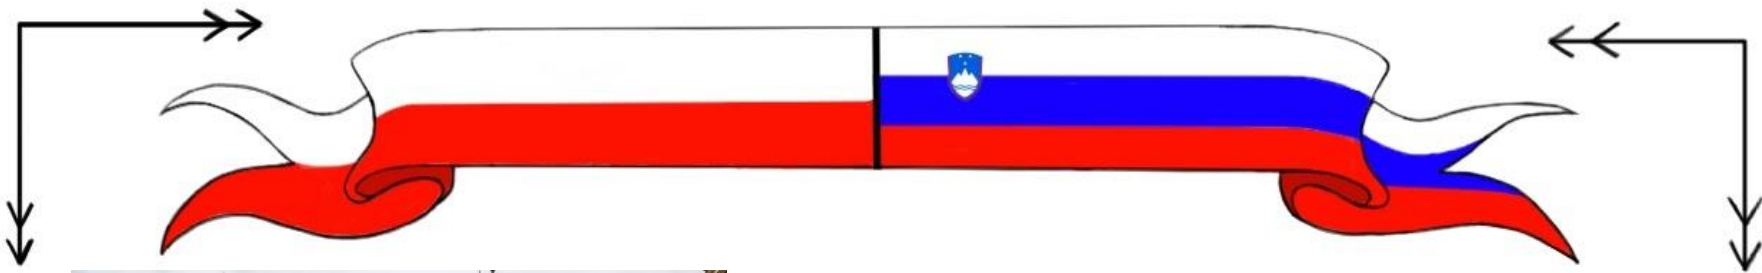

The COVID-19 outbreak is caused by an accidental release of the virus from the Wuhan Virus Research Institute laboratory

At the very beginning of the pandemic many people were afraid that shops will be closed so they bought products from shops leaving empty shelves.

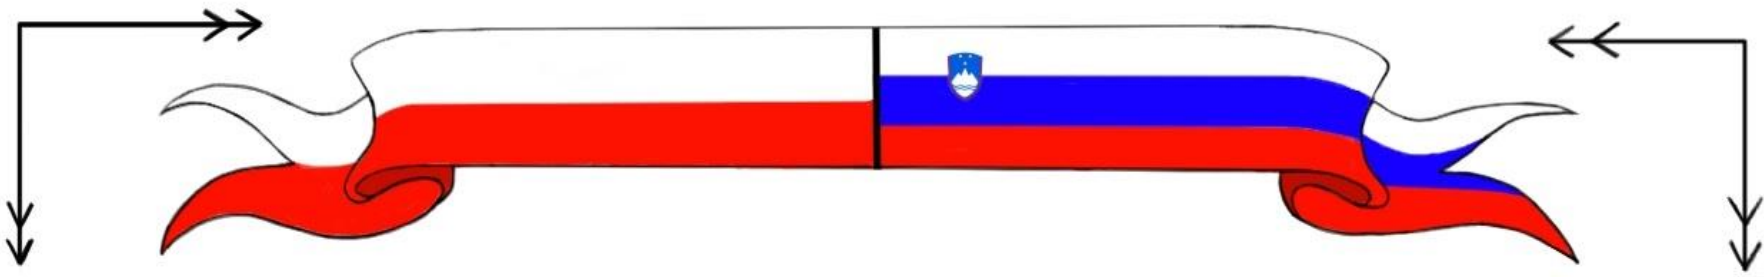

Stop the madness!

Unfortunately, at the time of the threat of COVID-19, there are people with the opinion that there is no coronavirus. They organize protests demanding the lifting of restrictions and a return to normal life.

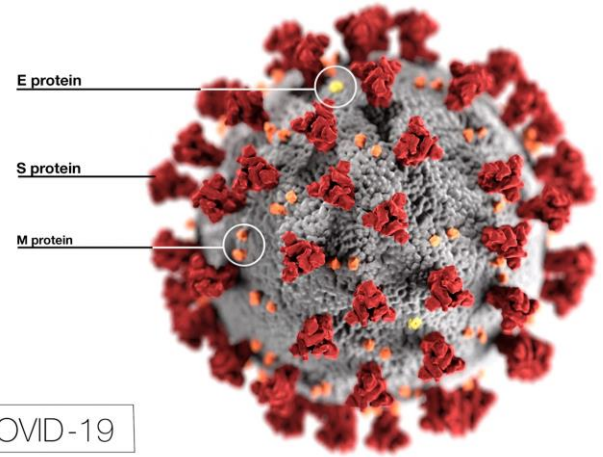

# CONSPIRACY THEORIES

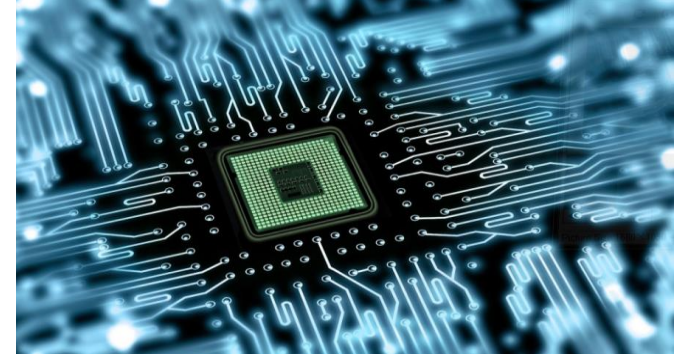

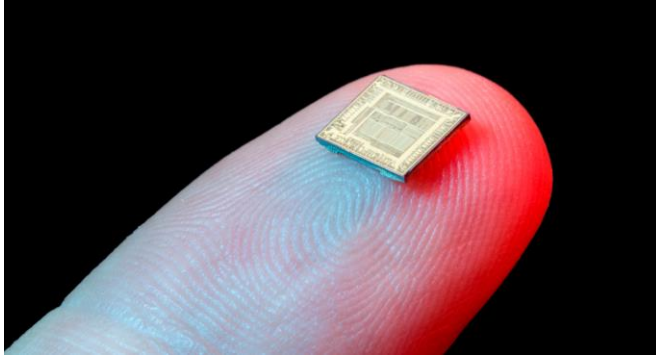

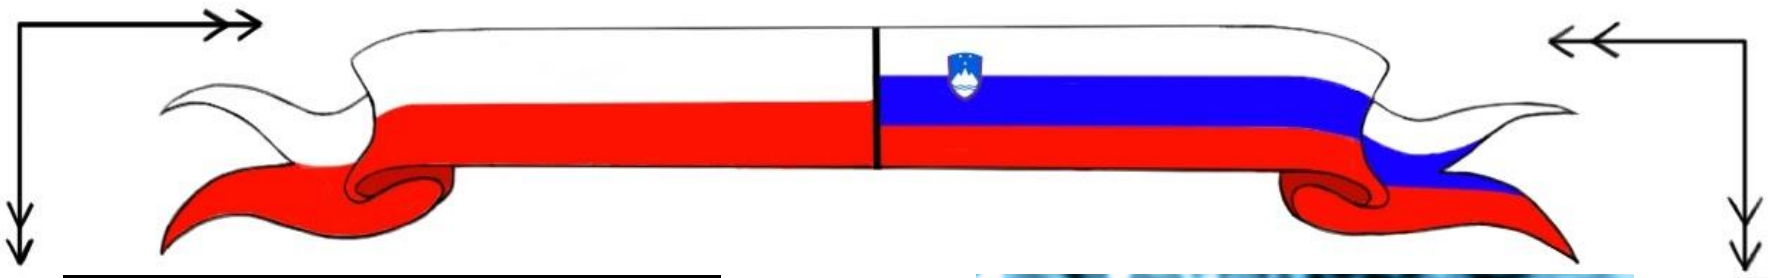

The coronavirus vaccine would modify human DNA.

Some people believe that COVID-19 was created as a biological weapon and that COVID-19 didn't only escape from a lab, but it was intentionally created by Chinese scientists.

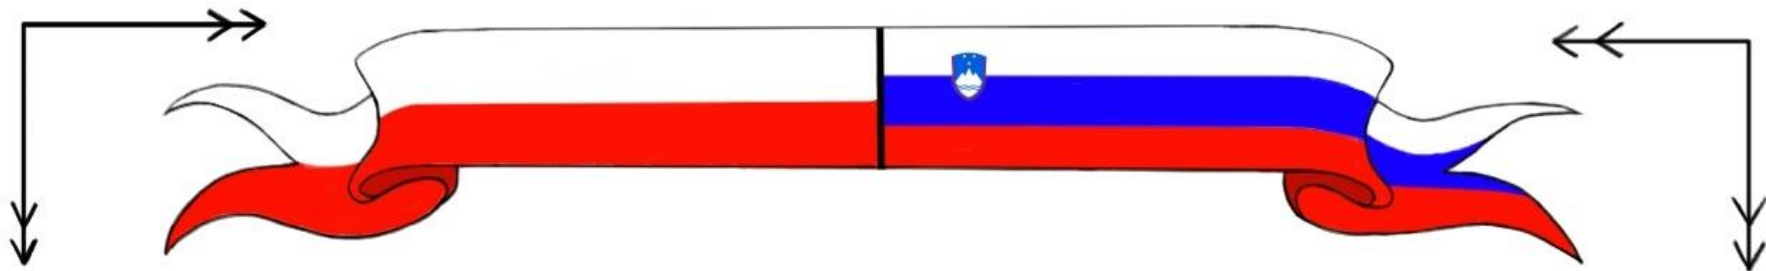

A lot of people believe that with vaccine we will receive a small microchip that will collect data about our location so it will be easier to control us.

**World: 101,83 mln**

**Poland: 1,69 mln**

**Slovenia: 85,536**

Translation: **From neighbors! Dear Madam (surname), in connection with your work as a nurse, please do not live on the street (street's name) in Płock. Once the threat ceases, we will let you return and lead a normal neighborhood life. The coronavirus is no joke! Father Marek from our parish also supports us. If you don't comply with our (cross off: requirement) requests, we won't let you in. With respect, the Neighborhood Committee.**
